The diagram illustrates a card management system architecture. At the bottom, a small square (11) connects to a larger square (12) containing a circle. This connects to a computer (13) with a monitor and keyboard. The computer (13) is bidirectionally connected to a cloud-shaped network (14). The network (14) is bidirectionally connected to a rectangular card management center (15). The card management center (15) is bidirectionally connected to a cylindrical database (16) and a computer (17) with a monitor.
